In accordance with the state tariffs, a one-time, non-refundable quotation development and engineering preparation charge of **\$60,000** must be paid in advance to AT&T to offset the expenditures incurred for providing the special construction estimate. After this payment is received, AT&T will proceed with developing the estimate of charges for the special construction associated with your request. AT&T has the right to apply more applicable engineering preparation fees for any large, complex and/or unique projects that will require excessive engineering hours to develop a detailed cost quote. After the special construction estimate of charges has been developed, a contract with this information will be provided to you for your approval. Once the agreement to the special construction charge is confirmed by returning the original signed contract and full payment, AT&T will schedule the work to meet your request. This estimate preparation payment along with this signed authorization; should be returned to the address noted before AT&T will proceed with the work.

**Customer Authorization**

I have requested and authorized AT&T upon receipt of the **\$60,000** payment mentioned above, to prepare a cost estimate associated with making changes to AT&T's existing network on my behalf. I understand that I am responsible for any additional quotation development and engineering preparation costs that AT&T incurs beyond the **\$60,000** payment in the above paragraph, in connection with preparing this cost estimate even if I choose to cancel the request prior to receiving the cost estimate. I also understand that, once I obtain the cost estimate for the special construction work, I am not obligated to proceed with the work. I further understand that if I proceed with the requested work, the engineering charges are included as part of those costs.
